EDUCATION

Game Design B.S.

Full Sail University

2021 - 2023

EXPERTISE

Unreal Engine

Source Control

Confluence

Jira

C++

Bug Squashing

Game Balancing

Professional Summary

I work as a creative technical designer, dedicating my time to personal projects and an internship. My focus is mainly on Unreal Engine, handling agile documentation using Confluence and tracking rapid development through Jira. For project management, I prefer using source control, particularly Perforce, and primarily concentrate on AI, combat, and UI aspects.

2023

Retro Ravens

Technical Designer

In 2023, I worked with team Retro Ravens producing our first game using **Unreal Engine**. I handled the AI, UI, and some of the combat system. Team information was handled in **Confluence** while tasks and bugs were tracked in **Jira**. Our choice in source control was **Perforce**.

2023 - Present

Game Group, LLC

Technical Designer

Game Group has been a pleasure to work with. We are a small indie company, and our game is currently in development. We utilize the same systems I used with Retro Ravens. I currently am the lead Technical Designer specializing in all things such as AI, UI, Combat, Level Design, and Mechanics.
